

Trusted Across Every Industry

Automotive	Aerospace & Defense	Medical
 ASE F1000 compliance for ECU, ABS, ESP, CAN, and management systems. ISO 9001.	 AS9100 and AS9100D certified for aircraft, aerospace, and transportation systems.	 ISO 13485 certified compliance for diagnostic imaging, medical equipment, and consumable devices.
Industrial Automation	Telecommunications	Energy & Power
 Robotics, with extensive compliance for PLCs, robotics, and motion control and automation systems.	 High-reliability 5G components, connectors, and modules for 4G LTE, 5G, and mobile broadband networks.	 High-voltage, high-reliability components for power generation, transmission, and systems, and smart grids.

QUALITY & COMPLIANCE

Certified to the **Highest Standards**

 ISO 9001:2015 Quality Management System certified across all manufacturing sites	 ISO 14001:2015 Environmental Management System certified to sustainable manufacturing practices	 ISO 27001:2013 Information Security Management System certified for OEM and Tier 1 customers suppliers
 ISO 45001:2018 Global Occupational Health & Safety Management System certified to protect all employees across all industrial applications	 RoHS 3 Compliant All products comply with European Union's RoHS 3 Directive (2015/863)	 CE & UL Marked Certified to CE and UL standards for safety, performance, quality and energy of product lines
